

Report

Teaching staff training in Czech University of Life Science Prague

Co-funded by the
Erasmus+ Programme
of the European Union

Czech University of Life Sciences Prague
**Faculty of Tropical
AgriSciences**

Asst. Prof. Dr. Saowaluck Yammuen-art

**Training to Czech University of Life Science Prague
Between 12-19 December 2018**

PISAI –Erasmus Plus Project

Report on Trip to European Universities

Teaching Staff

1. Name SAOWALUCK Family Name YAMMUEN-ART
Position Assistant Professor Department : Department of Animal and Aquatic Science
Faculty : Faculty of Agriculture University : Chiang Mai University

2. Purpose of Visit (Please list itinerary.)

Visit the Faculty of Tropical AgriSciences, The Czech University of Life Sciences, Czech Republic to extend bilateral cooperation on a variety of subjects and share the experience in international cooperation and research

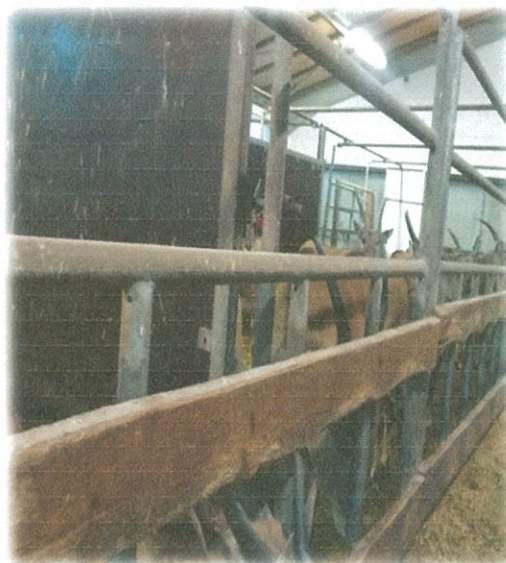

3. Details of activities during the visit

Date : **Thursday 13.12. 2018**

Activities : **Visit Lany Farm (Radim Kotrba and Tersia Needhem)**

Visit the university animal farm in Lany which could be great opportunity to see research activities. The activity including

1. visit the eland farm

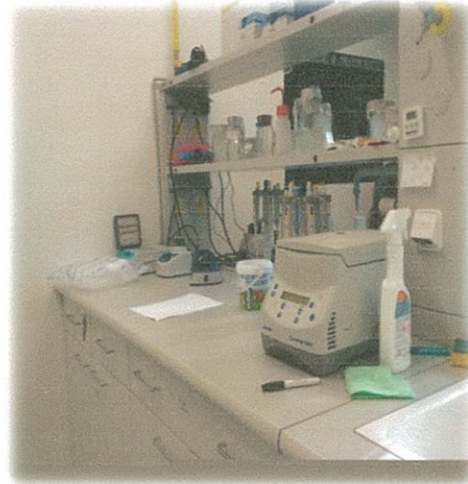

2. Observing Blood and feces collection

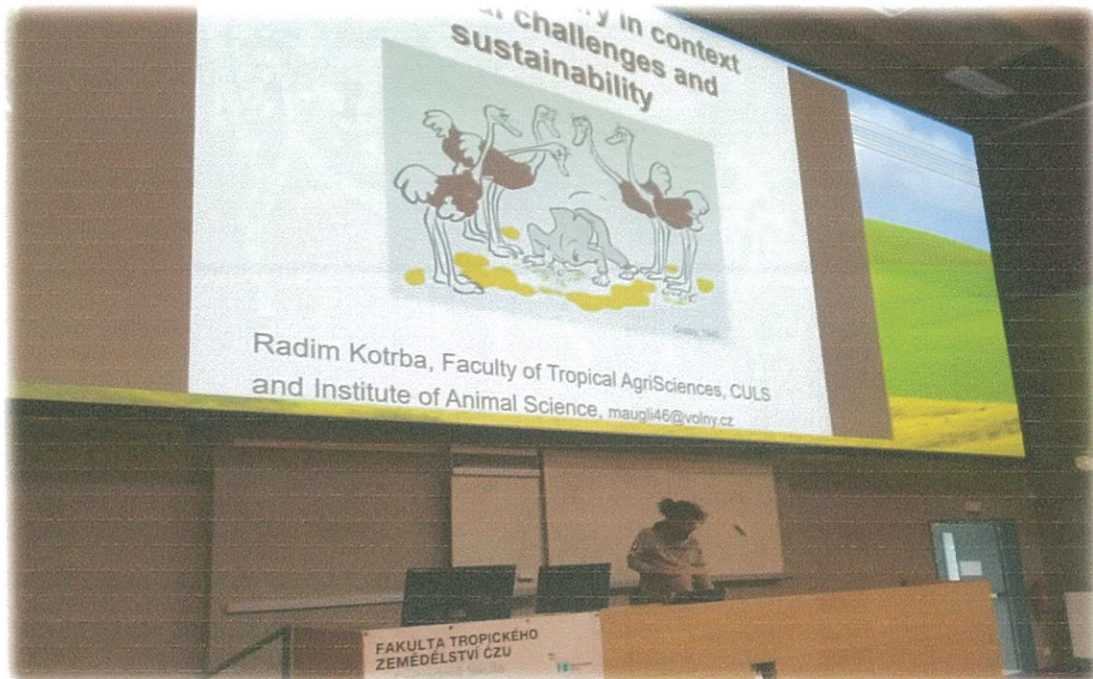

Date : Friday 14.12. 2018

Activities :

10:30-12:00 Visit Laboratories, guided by Barbora Bolfíková

12.15-14:30 Attending lecture "Introduction into tropical agriculture by Radim Kotrba (meeting room T1)"

Date : Monday 17.12.2018

Activities :

10:00-12:00 Meeting with Petra Chaloupkova (Associate Dean for International Relations)

We discussed about **International Credit Mobility program**

The main objective of the project is to support the mobilities of students among the project partners from the Czech Republic and Thailand. The main project partners are the Czech University of Life Sciences Prague (CULS) together with the Chiang Mai University (CMU).

Background:

International mobility has become part of a strategy for the training of young professionals. Trained workers can compete better on the international labor market. This project will contribute to the improvement of existing study programs and their modernization in line with EU standards, thus increasing the quality of education at the university.

Student mobility between CMU and the CULS is seen as a tool for strengthening existing co-operation. During the visits of experts from the CULS, the exchange of students and educators has been shown to play a key role in the development of administrative and educational processes at the university.

Mobilities:

The proposed mobility is mainly focused on the exchange of bachelor's or master's degree students (3 months). The aim is to increase pedagogical and research competencies of local educators. Mobility from the CMU are planned as a bachelor's or master's degree (one semester = 5 months), while students have the opportunity to study at the Faculty of Tropical Agriculture (CULS) in English to gain Approximately 30 ETCS credits per semester for successfully completed selected subjects.

Selection approach:

Mobility will be realized through responsible persons for international relations at the faculties involved or directly through the foreign departments of the university. A Memorandum of Understanding will be signed between universities where the mobility conditions will be specified. The faculty management, together with the person responsible for international relations (Vice-Dean or Head of the Foreign Department) are responsible for selecting candidates for international mobility. Candidates will be selected in the summer term 2019. Candidates' submissions will be sent to the partner university of the CULS and Skype interviews with selected candidates will be organized. The final list of candidates will be agreed between the partner universities, the respective CMU and the CULS. The student's study plan or research plan will also be discussed and approved during the summer semester of 2019. The ECTS credits earned at the partner university will be transferred to the student's home study results.

Outputs:

Mobility participants within the project will gain experience not only in the field of education and science, but also experience in working with an international team, multicultural environment, teamwork and communication, increasing their planning and organizational competencies. During the realization of their foreign residence, their language skills will also increase, as all communication will be in English. For students, these gained experience and skills play a key role in gaining future employment, as today's international experience from employers is highly valued and preferred

12:15-14:00 Attending lectures on Management (Petra Chaloupkova)

14:00-16:00 Present information of Faculty of Agriculture and Department of animal and aquatic science

Date : Tuesday 18.12 2018

Activities :

8:45-10:30 Attending lectures of Management by Petra Chaloupkova

12.15–14:30 Attending lecture on Breeding of Africa wild dog by Radim Kotrba (meeting room S6)

14:00-15:00 Present my research entitled "Screening and Characterization of Bacterial Inoculants Bacterial to Produce (Ensiled total mixed ration, eTMR) for Dairy Cow"

Date : Wednesday 19.12. 2018

Activities :

8:45-10:30 Attending lecture RNDr. Jiří Černý, Ph.D. (FTZ) - Yellow fever virus in the rhythm of samba (meeting room RKU II.)

4. Outputs and outcomes that will be beneficial to PISAI, double degree implementation between Thai universities and students

1. Establish connection with researcher/lecturer who can consult the students in PISAI program such as assistant professor Dr. Radim Kotrb, he is the principal lecturer in field of wildlife management at Czech University of Life Sciences Prague in the Faculty of Tropical AgriSciences, Department of Animal Science and Food Processing. He also works in field of nutrition therefore it is possible that we will invite him to be thesis advisor of the student in Master of Science Program in Animal Science (PISAI program)
2. Discuss for topic of value chain management in livestock in module 1 (value chain management) for PISAI program
3. Establish the alternative thesis topic for master exchange student of PISAI program

Signature  Date

5. Comments from Coordinator of partner university (CMU, KU and KKU)/ Head of Department

Assistant Prof. Dr. Saowaluck Yammuen-art is in management team of PISAI project. Her visit to Czech University of Life Sciences Prague (CULS) will enhance PISAI project in term of supervising students especially students from department of animal science. Her experience from the visit could show the PISAI student for comparing the study approach in animal science in Czech Republic and in Thailand.

Name Pornsiri Family Name Suebrongsang
Signature Pornsiri S. Date

6. Comments from Dean or Equivalent

it is a good opportunity for Dr. Saowaluck Yammuen-art to be able to learn and share experience with staff of Czech Univ. She could gain new knowledge and be able to share with staff from Thai Univ.

PISAI –Erasmus Plus Project

Report on Trip to European Universities

1. Name Pornsiri Family Name Suebpongsang
 Position Assistant Professor Department : Department of Agricultural Economy and Development Faculty : Faculty of Agriculture University : Chiang Mai University

2. Purpose of Visit (Please list itinerary.)

Visit the Faculty of Tropical AgriSciences, The Czech University of Life Sciences, Czech Republic to learning teaching technic, PISAI management meeting, extend bilateral cooperation on a variety of subjects and share the experience in international cooperation and research

3. Details of activities during visit on period of April 5-12, 2019

Date : **Friday 5. 04. 2019**

Activities : **9.00-10:00** Discuss about activities plan during visiting period with Dr. Petra Chaloupková

13.00-15:00 Visit each faculty of Czech University of Life Sciences

Date : Monday 08. 04. 2019

Activities : 9:30-14:00 Prepare content of Value Chain Module (under PISAI project at CMU in August 2019) together with PISAI project coordinator from Czech University of Life Sciences

Date : Tue 09. 04. 2019

Activities : 10:00-12:00 PISAI Skype Meeting with all partner and
13.00-15:00 Interview and select Czech University of Life Sciences's master student to joint Value Chain Module (under PISAI project) at CMU in August 2019.

Date : Wed 10. 04. 2019

Activities : 9.00 -12.00 Participate and provide comment in thesis seminar to CULS's Master's student.

Date : Thursday 11. 04. 2019
Activities : 9.00-12.00 Visit lecture on agricultural policy.

Date : Friday 12. 04. 2019
Activities : 10.00-15.00 Visit lecture on the topic of international trade.

4. Outputs and outcomes that will be beneficial to PISAI's double degree implementation between Thai universities and students

1. Obtain the teaching skills for teaching student in the topic of agricultural economics for both PISAI students and CMU students.
2. Prepare the module 1 (value chain management) for PISAI program in Aug 2019
3. Establish the alternative thesis topics for master exchange students of PISAI program

PISAI –Erasmus Plus Project

Report on Trip to European Universities

1. **Name**PANUPON..... **Family Name**HONGPAKDEE.....
PositionASSISTANT PROFERSOR..... **Department of Horticulture Faculty of Agriculture University**.....Khon Kaen University.....

2. Purpose of Visit

1. To have meeting consult with the team in CULS (Dr. Petra Chaloupková and Prof. Dr. Didier PILLOT) for the setting of 'PISAI Project Module II' which held on 22 October to 8 November, 2019 at Faculty of Agriculture, Khon Kaen University. This 2nd Module contain the main purpose on 'Environmental/ Ecosystem of Sustainable Agriculture' via the preparation of all student to learn and fulfil the training objectives at Roi Ed Diary Farm station.

2. To participate the presentation for all 6 Thai students as the progress of their thesis proposal and give discussion idea or recommendation as the defining student research framework.

3. To visit the CULS faculty member for further collaborate in research expertise.

4. To visit and learn the culture, the beauty of Prague Architecture as Prague City Tour

3. Details of activities during visit

In Autumn 2019, both of us (Assistance Professor Dr. Panupon Hongpakdee and Dr. Sukanyala Cheankwan) as an academic staff team with 6 Thai students under the PISAI project (Participatory and Integrative Support for Agricultural Initiative) from Thai partner universities (Khon Kaen Univeristy, Chiang Mai University and Prince of Songkla University) spent the time to the Czech University of Life Sciences Prague (CZU) as arranged by the Faculty of Tropical AgriSciences (FTA). The European partner university, FTA prepared this program for the students of the joint double-degree Master's program in sustainable agriculture of the PISAI project, to get familiar with the education in the Czech Republic and the European Union and get ready for Module 2 which will be led by a European partner university, Montpellier SupAgro.

I had participated this academic program which held for 9 days as represent in table below, range from 23rd September to 2nd October 2019, prepared by Dr. Petra Chaloupková (Vice-dean for International Relations) and Dr. Olga Leuner (Vice-Dean for Science, Research and Doctoral Study) of the FTA and practical management of activities was ensured by two PhD students of the FTA, Mr. Jas Staš and Miss Veit Ny.

The aim of my visiting was to motivate the 6 Thai students to explore, learn and experience the new education system, student performance, as well as the different culture from Thailand. I had participated a wide range of activities included in the program i.e.

- Meeting consult with the team in CULS (Dr. Petra Chaloupková and Prof. Dr. Didier PILLOT) for the setting of 'PISAI Project Module II on Environmental/ Ecosystem of Sustainable Agriculture' issue which held on 22 October to 8 November, 2019 at Faculty of Agriculture, Khon Kaen University, Thailand.

- A small academic presentations for our student, which they exhibit their master thesis progress to the Czech committee (Dr. Petra Chaloupková and Dr. Olga Leuner). They could get some useful feedbacks, recommendations, suggestion to improve their proposal. All of students also participated the lectures and teaching seminar at the FTA

I had also given my presentations about my research work and research outputs to the Czech colleagues as the title of "Current Status Flower Production in Thailand".

- The trip to the countryside, and excursions to the university cattle and eland farms. That is my first experience to close up this creature.

- Visiting the whole campus of the university (research facilities, faculties, laboratories, botanical garden etc.). I had a chance to visited Ethnobiology lab of Prof. Dr. Ladislav who had collaborated with Chemistry Professor, KKU.

- Visiting the beautiful Prague city to many historical, natural and important sites of the Czech Republic. Furthermore, they had the chance to travel to a “spa city”, Karlovy Vary, to see the different medieval architects, beautiful view of the autumn season, and try famous food and drinks in this place.

This visiting was a great experience of my life all the thing which I gain a lot will be motivating my academic life as well as personal development.
