

Economic calculations : precise definitions

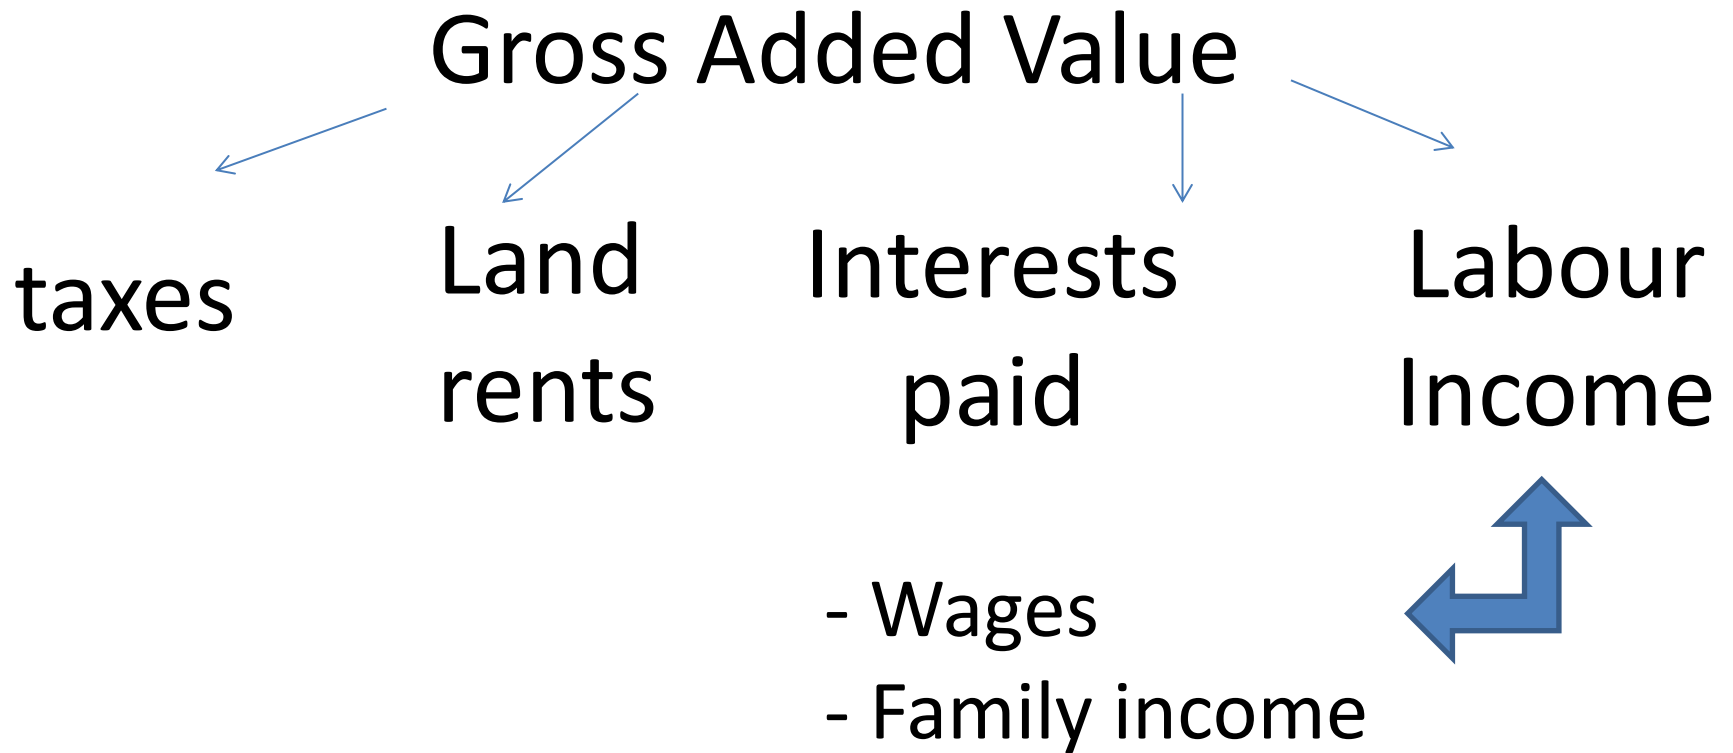

Gross Product (GP)/Rai = Yield/rai x Price

Intermediate Inputs (II) = Costs (without labour)

Gross Added Value (GAV) = GP - II

Net Added Value (NAV) = GAV – depreciation of the capital
(equipment, infrastructure)

Economic calculations : precise definitions

Economic calculations : precise definitions

Net Added Value (NAV)

- Taxes, land rent, Interest paid

= All labour income

- Wages to external labour

= Family labour income

Farm Profit = Family labour income/ Total capital
